

Detailed Speed and Volume Breakdown by Hour and Direction

The data in this document is taken from 7 day traffic tube counts all conducted 3-10 December 2020. The data for each location includes a breakdown of the number of vehicles and their speed profile by hour of the day.

Separate tables are presented for:

- **Weekday (Mon-Fri) average in both directions**
- **Weekday (Mon-Fri) average in each direction**
- **Saturday in both directions**
- **Sunday in both directions**

Definition of Terms used in Tables

85th Percentile Speed: The speed at which 85% of vehicles travel at or below. It is the standard measurement used to summarise and compare general traffic speed on a road.

Light vehicles: Typical passenger vehicles, not heavy vehicles such as trucks.

Modal speed: The speed which repeats the most frequently. Not be to be confused with the average speed.

Average speed: The total sum of the measured speeds divided by the number of vehicles.
