Removal of timber structure at Everett Street entrance to Dunstan Reserve

Moreland is planning to construct its fifth major stormwater harvesting system at Dunstan Reserve in Brunswick West!

Maintenance path from Everett Street

Moreland Council is proposing to remove the timber structure situated over the footpath entering Dunstan Reserve from Everett Street.

The removal will support a clear path to maintain the park and the stormwater harvesting system.

This stormwater harvesting system intends to divert stormwater from local areas for treatment, storage and

reuse as irrigation of the ovals and community gardens at Dunstan Reserve.

The system includes a new swale that will support plants, habitat and water infiltration into the water table below.

The location of the swale will obstruct the exiting maintenance path from Lyne Grove. The proposed maintenance path will run from Everett Street and needs the timber structure be removed for access.
