How often do you get here:

Louisa Street Streetscape Upgrade

The street and area, especially around the library is not safe. The carparks I walk through are so dangerous with the cracked and uneven paths. All the buildings around that area look dirty and un-maintained. Feels like a carpark when its heart of Coburg; Bike lane improvement at Munro street; Round about is unsafe; Pedestrian unfriendly, car discontinued; VIC mall crossing is unsafe (pedestrian row).

Street like overdue for an upgrade. Footpaths should be expanded. No street parking spots should be lost, Car access should remain as is.

traffic is not managed well, unsafe for peds.

Improve security and

safety in laneways

better ped lanes in carpark; speed bumps; flashing speed signs

more greenery and trees and plants; safer pedestrian access between safeway car park and Sydney road/Harding st.

The area is very unattractive and unsafe for pedestrians and bikes. A lot of traffic moves through this area and there is no grade separation for pedestrians. There is very little green space along the road, for one of probably Coburg's most visited spaces it lacks nice aesthetics. It doesn't feel very safe walking through the car parks at night due to a lack of lighting.

visually appealing space.

As a pedestrian and with a baby, I don't feel safe walking along this street. The footpath is wedged between the street & carpark.
